DETAILED ACTION

Response to Arguments

In light of the amendment filed August 19, 2004, the previous rejection filed March 12, 2004 has been withdrawn.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or make obvious an IC package where leads are positioned on a discrete mounting ring having an inner perimeter with a first encapsulation confined within the inner perimeter formed over wires, die and a portion of leads with a second encapsulation formed over the first encapsulation, ring, portion of lead and top and bottom of substrate including all the limitations of the independent claims.

While the prior art as illustrated Otsuki does disclose leads positioned on a ring with a first encapsulant confined to the ring with a second encapsulant surrounding the first encapsulant, it is distinguishable in that the bottom surface of the substrate is not covered with the second encapsulant. Furthermore, because the substrate is a heat sink/spreader, its bottom surface exposed would optimize heat dissipation; this, one of ordinary skill in the art would not be subsequently motivated to cover the bottom with an encapsulant material.
